Cell Impact AB's (Nasdaq First North GM: CI) wholly owned subsidiary Cell Impact Japan Inc. has received an order worth MSEK 1.6. The order is for a flow plate design project and involves flow plate prototype production. It is a continuation of earlier established activities in Japan and will be delivered during the third quarter of 2022.

As part of a more extensive development program, the flow plate prototyping project will use a smaller version of the Cell Impact Forming™ equipment with low tooling cost and a comparatively quick turnaround time. As a result, the customer can reach their development objectives and save development time and cost.

"I'm very pleased with this order as it expresses the continuity of our activities in Japan," says Mr. Shigeru Nakagawa, Managing Director of Cell Impact Japan Inc.

Since 2021 all Japanese market activities have been managed by Cell Impact Japan Inc.

About Cell Impact

Cell Impact AB (publ) is a global supplier of advanced flow plates to fuel cell manufacturers. The company has developed and patented a unique method for high-velocity forming, Cell Impact Forming™, which makes it possible to produce flow plates with more advanced designs, which in turn creates more cost and energy-efficient fuel cells compared to conventional forming methods.

The Cell Impact share is listed on Nasdaq First North Growth Market and FNCA Sweden AB is the company's Certified Advisor (CA). Contact info: +46 8-528 00 399 or info@fnca.se.
