

PRESS RELEASE

H & D Wireless joins Omlox, the open location standard for Industry 4.0

Stockholm, November 25th, 2020 - H&D Wireless has joined PI Sweden (se.profibus.com) and is amongst the first in Scandinavia with particular interest in Omlox (omlox.com) to accelerate the adoption of position location and digitalization for smart factories.

GEPS® (Griffin Enterprise Positioning Services) is an original H&D Wireless IoT cloud platform, providing real time location services with analytics (RTLS and AI) allowing manufacturing companies to digitize, visualize and optimize business processes in real-time. Several GEPS pilot installations have successfully been running since 2018 at major Swedish automotive and Industry manufacturers. With Omlox gaining increasing traction by major European industrials as the framework for common API and standards for location technology in Smart Factories, H&D Wireless is looking forward to collaborating with the entire ecosystem and stakeholders. Interoperable deployment of indoor and outdoor location technologies will allow increased choice, further cost savings and maximize efficiency for industry customers.

On the path to Industry 4.0, Omlox is an open and interoperable standard that is revolutionizing use of real-time location services for smart factories. The result is an interoperable ecosystem of providers and solutions that finally makes industrial locating more widely available. With Omlox, products from different manufacturers can be networked together in a core zone and various locating technologies (ex. UWB, Wi-Fi, GPS, 5G, RFID, and BLE) can be easily inter-connected, all for the first time.

About. Om H&D Wireless AB

H&D Wireless is a Swedish provider of technology and services within the Internet of Things (IoT) and Real-time positioning (RTLS+GPS) with the cloud platforms Griffin® and GEPS®. Founded in 2009, H&D Wireless has delivered over 1 million wireless products to date for IoT and M2M solutions worldwide. The company develops and delivers solutions that digitize and visualize physical processes and identifies, among other things, the management of materials, tools and machines with its proprietary solution GEPS® (Griffin Enterprise Positioning Service). Since mid-year 2019, the MES system Casat is also part of the Group. Casat customers include Penta, Swegon and Parker. H&D Wireless share is since December 2017 listed on nasdaq first north growth market in Stockholm with Aqurat Fondkommission AB as Certified Adviser.
