

Press Release

H&D Wireless joins ABB's SynerLeap innovation growth hub

Stockholm, September 30th, 2019 – H&D Wireless, has become a member of SynerLeap, part of ABB. SynerLeap is working to connect the leading industrial technology and service companies with the best of ABB, together to scale up and grow.

SynerLeap's goal is to help innovation companies accelerate and expand in a global market together with ABB. The collaboration gives access to ABB's network, clients and technology. SynerLeap started with a focus on Sweden, expanded to the Nordic countries and is now also open to companies from all over the world. The head office is at the core of ABB's development center, in Västerås.

“We welcome H&D Wireless on board and already see several areas within ABB production and logistics, which could benefit from a real-time location system by a platform and service provider like H&D Wireless AB.” says Peter Löfgren, CEO SynerLeap

“We are excited to join SynerLeap. Through this collaboration, we can gain insight into ABB's industrial processes, conduct discussions with their respective business units and customers, and understand the challenges in their material flow. ABB and H&D Wireless are positioned to work side by side in this journey with SynerLeap as a facilitator.” Says Pär Bergsten, CEO and founder of H&D Wireless

The fourth industrial revolution (Industry 4.0) is ongoing and with GEPS® for Industry, it is easy to gain full visibility and traceability for material management processes, improve production flows and maximize resource use.

About SynerLeap

SynerLeap is a growth hub started by ABB in September 2016. It gives ABB access to innovative technology and growth-driven entrepreneurs, while giving SynerLeap companies the opportunity to take part in ABB's network, laboratories and knowledge. It creates an ecosystem where small technology companies can grow and expand in a global market in three areas: industrial automation, robotics and energy. Today, there are 52 member companies in SynerLeap.

About ABB

ABB is a pioneer with cutting-edge technology in electrification products, robots and drive systems, industrial automation and power grids. They serve customers in energy, industry and transport and infrastructure worldwide. With over 125 years of innovation, ABB today creates the future of industrial digitalization and drives the energy conversion and the fourth industrial revolution. ABB operates in over 100 countries and has about 136,000 employees. www.abb.com

About H&D Wireless:

H&D Wireless is a leading Swedish provider of Internet of Things (IoT) technology and Real-Time Location Services (RTLS) to enterprise and manufacturing customers. Founded in 2009, H&D Wireless has delivered over 1 million wireless products to date for IoT and M2M solutions worldwide. The company develops and delivers solutions that digitize and visualize physical processes and identify, among other things, the management of materials, tools and machines with its proprietary solution GEPS® (Griffin Enterprise Positioning Service). Since mid-year 2019, MVV Holding with the MES system Casat is also included in the group. Among the Casat customers are Volvo Penta and Parker. H&D Wireless shares have been listed on Nasdaq First North in Stockholm since December 2017 with FNCA Sweden AB, +46(0)8-528 00 399, info@fnca.se, as Certified Advisor.
