

RAYTELLIGENCE

Pressrelease

2022-03-01

Raytelligence receives FCC approval in the United States

Raytelligence product EaZense has been tested and is now certified by the Federal Communications Commission (FCC). The FCC is the authority in the United States responsible for all certification of electronic products.

Raytelligence is one of a relatively small number of companies that have certified a 60 GHz radar in the United States. The EaZense certified product is a sensor system for use in the supervision of the elderly with functions such as attendance and case detection.

"The EaZense system will now be sold in the US market by our partner Careteq, which assesses the potential as very large," says Pelle Viberg, CEO of Raytelligence.
