Unibap ISO 9001: 2015 certified

Unibap has been certified according to SS-EN- ISO 9001: 2015, which is a management system standard for the quality processes in a company. The quality certification confirms that the management system for Unibap meets international standards and promotes continuous improvement work in the company.

ISO 9001 is a standard for quality management intended for the business processes of a company or organization. It can affect everything from how we respond to and document customer relationships to how we systematically work to develop our talents and their knowledge. A management system describes how we constantly improve and adjust our operations to meet customer needs.

- The goal of our internal quality work is to satisfy and try to exceed our customers' expectations and needs by constantly developing and delivering the best products and services in the most resource-efficient way. This certification is a certificate that we have good processes in place to succeed with it, says Fredrik Bruhn, CEO

ISO SE-EN 9001: 2015 certification has been issued by RISE, which carried out an independent third-party audit of the Unibap management system.
